

Sales of Retail and Online Product

1. Project Overview and Objective

The objective of this project is to analyze retail and online sales data to identify sales trends, evaluate profitability, understand Customer behaviour, and support business decision-making through interactive Power BI dashboard

2. Data Sources

- **Source Description and Timeline:** Google Dataset Search and 2023
- **Domain:** Sales and Retail

3. Problem Statement

- To analyse sales performance across regions and products to identify top-performing areas and profit trends..

4. Tools & Technologies

- **Excel:** Data cleaning, transformation, and Pivot Tables.
- **Power BI:** Data modelling, visualization, and interactive dashboard creation.

5. Data Pre-Processing (Excel / Power Query)

Tasks Performed:

- **Filtering & Sorting:** Organized data to focus on relevant records.
- **Pivot Tables:** Generated Pivot Tables for data summarisation and initial insights.

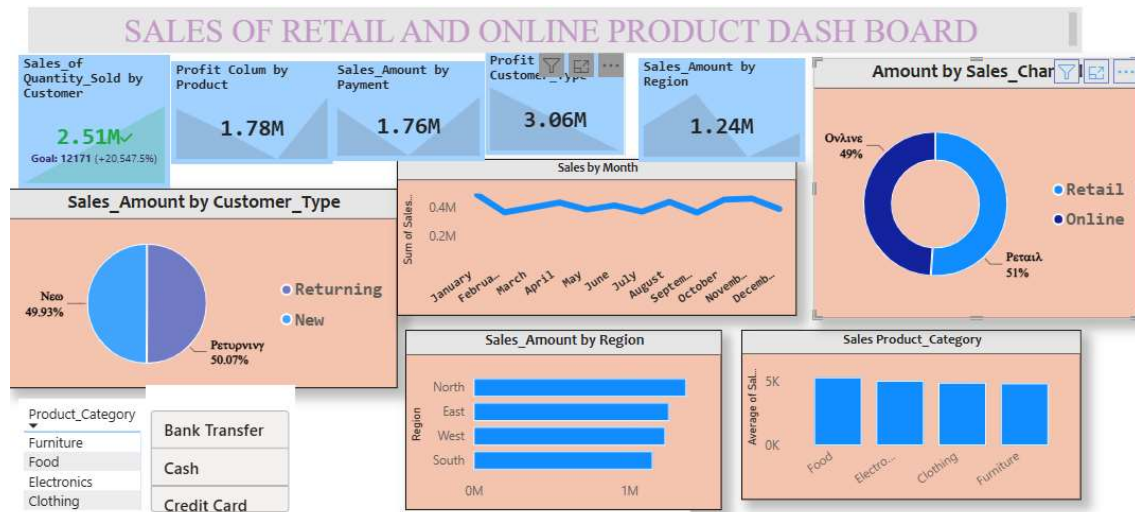

Row Label	Sum of Sales_Amount

Grand Total	6487847.07	5019265.23	2475304.55

6. Analysis and Visualizations (Power BI)

Dashboard Features:

- **Multiple Visualizations based on problem statement:** Bar charts, line charts, pie charts, cards, and tables to communicate insights. **(List Out)**
- Make your Report interactive Layout using **Drill-down, Filters and slicers**
- **Create a consolidated Report /Dashboard.**

7. Insights & Conclusions

Sales Channel Analysis

- Retail contributes approximately 51% of sales.
- Online contributes approximately 49% of sales.

Customer Analysis

- New and Returning customers contribute almost equally.

Regional Analysis

- North region generates the highest sales.
- South region generates comparatively lower sales.

Product Analysis

- Food and Electronics categories perform strongly.
- Furniture and Clothing require further promotional strategies.

8. Conclusions

This project successfully analyzed retail and online sales data using Excel and Power BI. Data cleaning was performed to improve to calculate key business metrics such as Total Sales, Total Profit, Quantity Sold, and Profit Margin. The interactive dashboard provides valuable insights into sales performance by region, product category, customer type, and sales channel. Overall, the dashboard helps businesses monitor performance, identify profitable areas, and make data-driven decisions for future growth.
